The Missouri AgrAbility Project is supported by funds from the USDA/NIFA under 2018-41590-22323 and AgrAbility for Pennsylvanians under USDA/NIFA 2017-41590-27105.

Missouri's Beginning Farmers and Ranchers Development Program is supported by funds from the USDA/NIFA under BFRDP #2018-70017-28578.

Learning objectives

- Participants will be able to list three new, reliable, and relevant resources for Women in Agriculture: Safe Animal Handling.
- Participants will be able to help women in agriculture involved in animal handling reduce the potential risk of injury.
- Participants will be able to communicate how to access resources, connect with agriculture safety and health professionals and join eXtension Ag Safety and Health CoP, <https://ag-safety.extension.org/>.

Two e-books on safe animal handling

and other resources for women in agriculture at: <https://ag-safety.extension.org/women-in-agriculture/>

At the annual Pearls of Production two-day, hands-on workshop, Missouri's women producers learn tips for safe animal handling.

Overview

The **Agricultural Safety and Health eXtension Community of Practice (CoP)** is a collaborative effort between universities, industry, and government to provide user-friendly information for the general rural population, agricultural producers, and agricultural safety and health professionals. The Ag Safety and Health CoP has more than 90 members that work together to provide, produce, and review agricultural safety and health information. The following information provides an overview of the site content and links to usable resources.

- **Ag Safety & Health Resources:** Various types of resources are available from the homepage (<https://ag-safety.extension.org/>), including options for self-paced and instructor-led learning, training and resources for instructors, videos, publications, and topic pages on various safety and health topics.
- **Ask an Expert:** If you still have a question after visiting the resources on the site, click here to be directed to eXtension's Ask an Expert option to ask a specific question that will be answered by an agricultural safety and health professional.
- **Online Safety Course:** Click here to learn how to enroll in an online agricultural-safety certificate course.
- **Upcoming Events:** Click here to locate professional education opportunities.

If you would like join the CoP, contact Linda Fetzer at lmf8@psu.edu.
